

Commercial Network Reset

A fictional head-of-commercial case study demonstrating network strategy, route economics, scenario planning and executive communication.

FICTIONAL • ILLUSTRATIVE DATA • ORIGINAL VISUAL IDENTITY

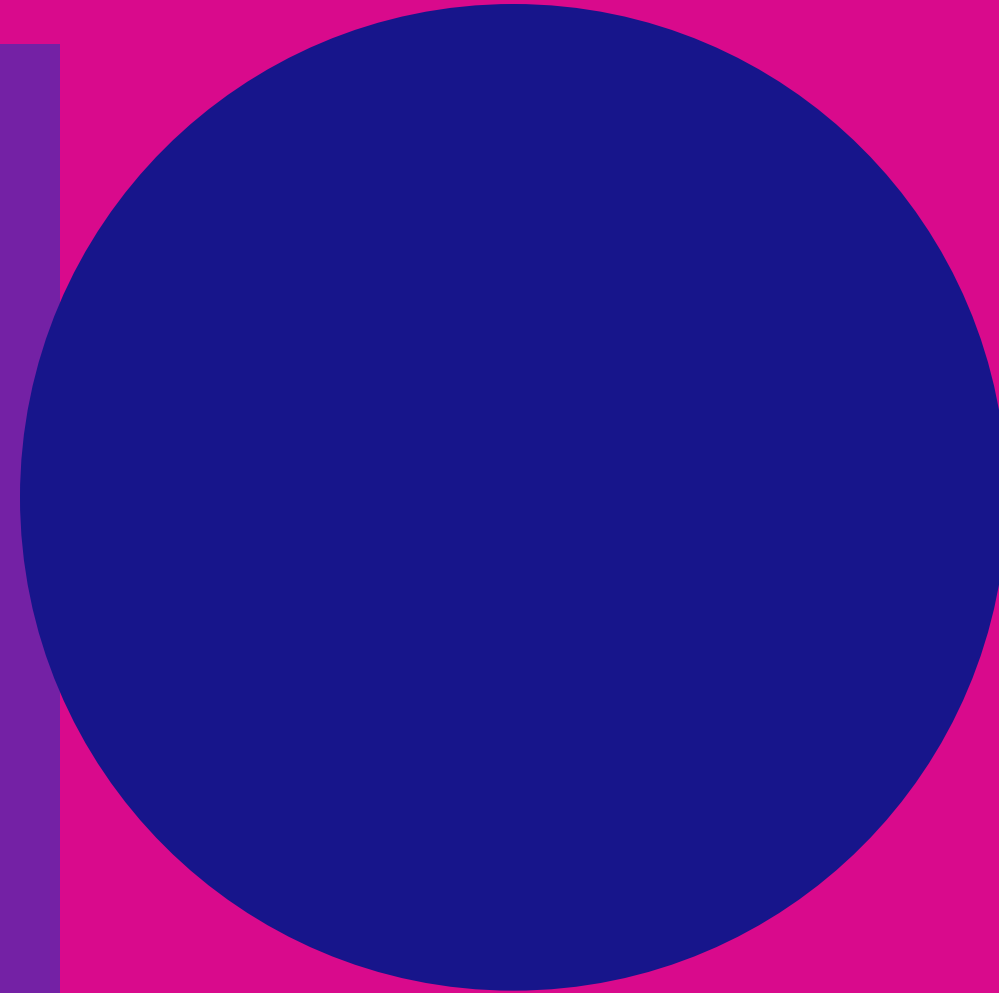

The brief

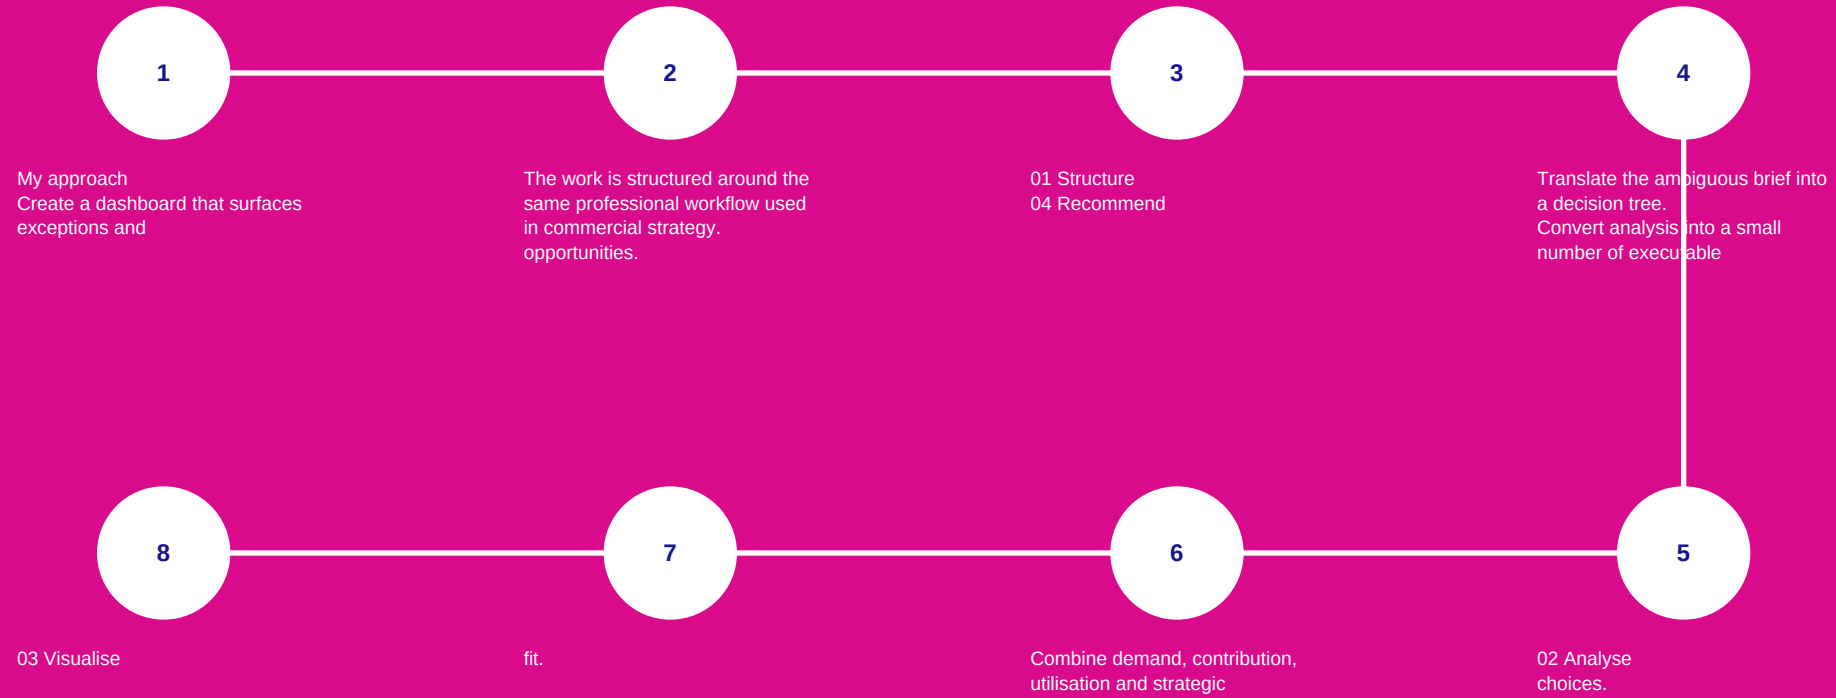

Turn a complex commercial question into a repeatable decision system.

Business question

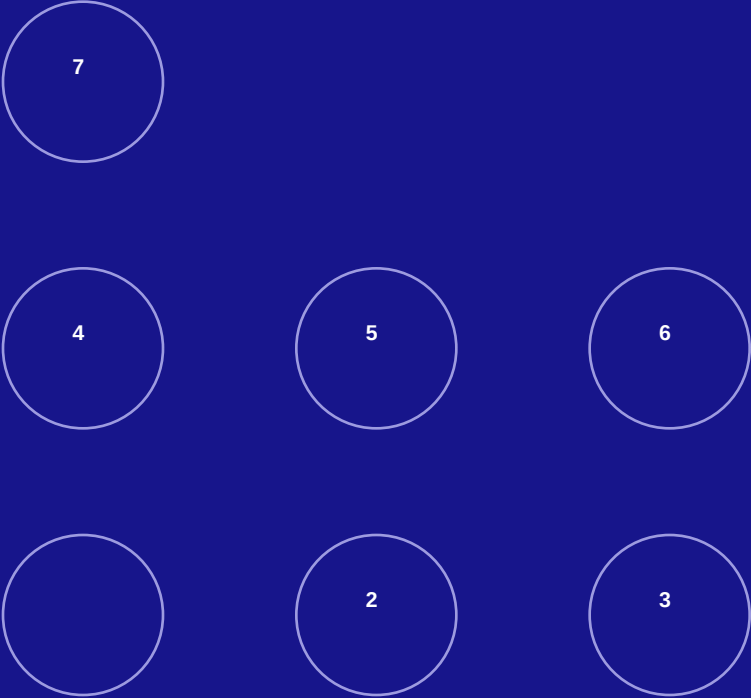

Which routes should we protect, grow, optimise or redesign?

Constraints

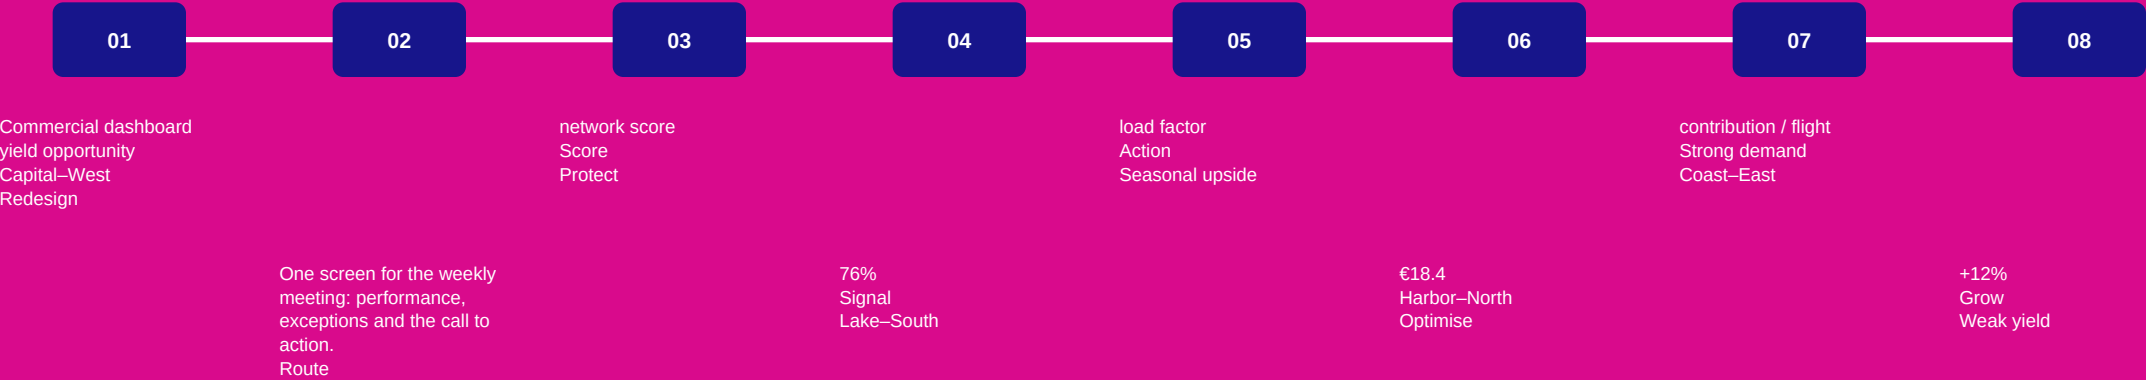

Route scorecard
A lightweight model makes trade-offs visible without pretending to be a full forecasting engine.
Route
Demand
Contribution
Utilisation
Score
Decision
Harbor–North

GROW
Capital–West
PROTECT
Lake–South
OPTIMISE
Coast–East
REDESIGN

Scenario planning

Show the decision — then show the consequence.

Scenario

Move

Annual contribution

Change

Risk

A / BASE

Current schedule

€1.00m

0%

Low

B / FOCUS

Shift 2 weekly rotations

€1.14m

+14%

Medium

C / GROW

Add 1 seasonal aircraft

€1.21m

+21%

Higher

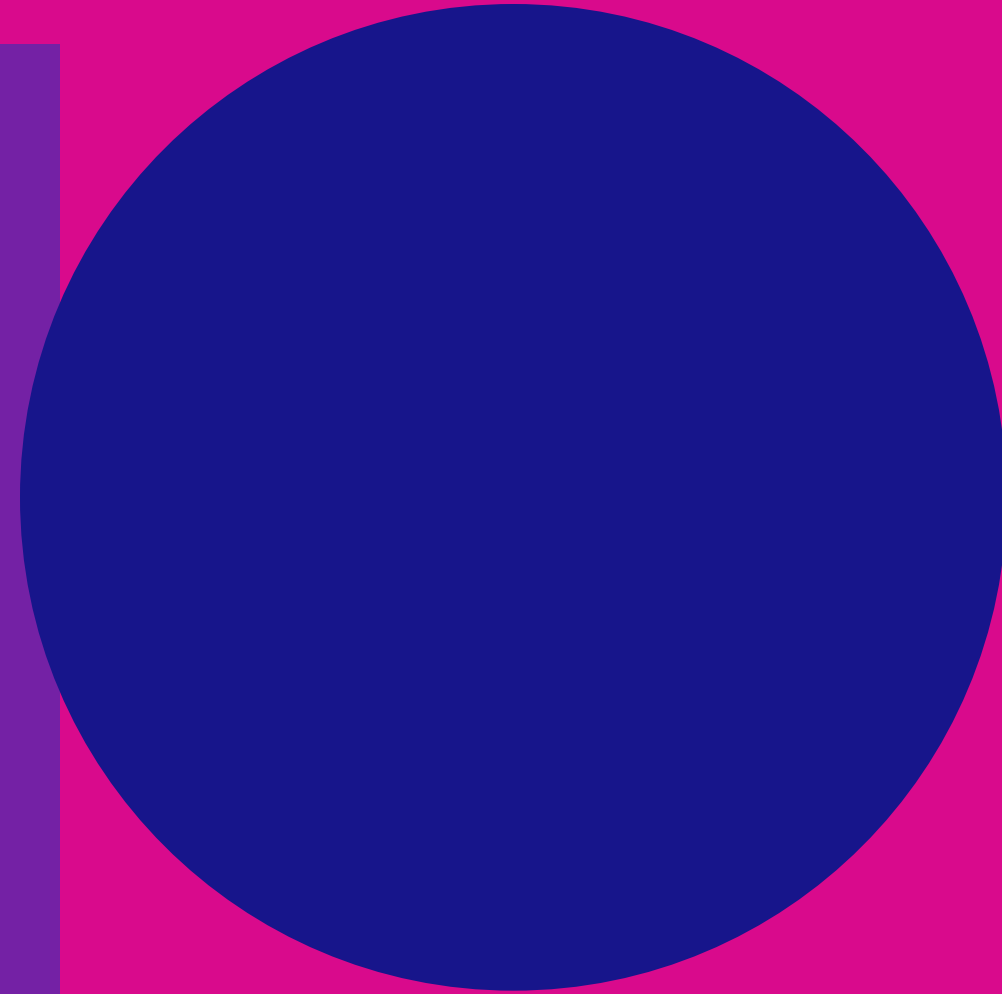

Recommendation: Scenario B — meaningful upside without taking on the full cost and complexity of expansion.

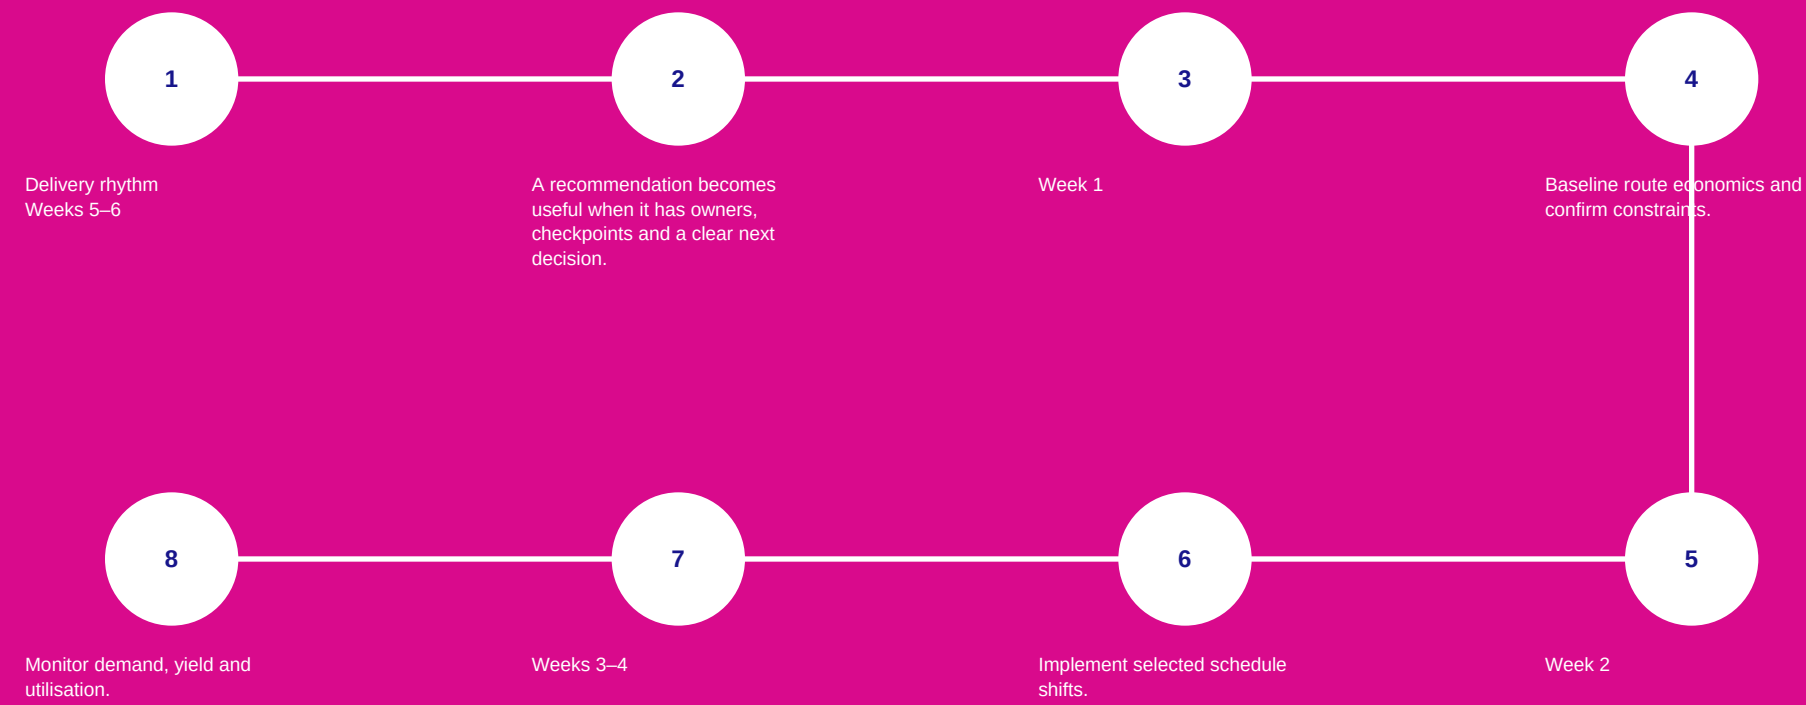

Recommendation

Protect the core. Reallocate the margin. Learn before scaling.

PROTECT

Keep high-performing routes stable
and avoid unnecessary schedule
churn.

What this demonstrates

A portfolio-safe reconstruction that makes the underlying professional skills visible.

Executive storytelling

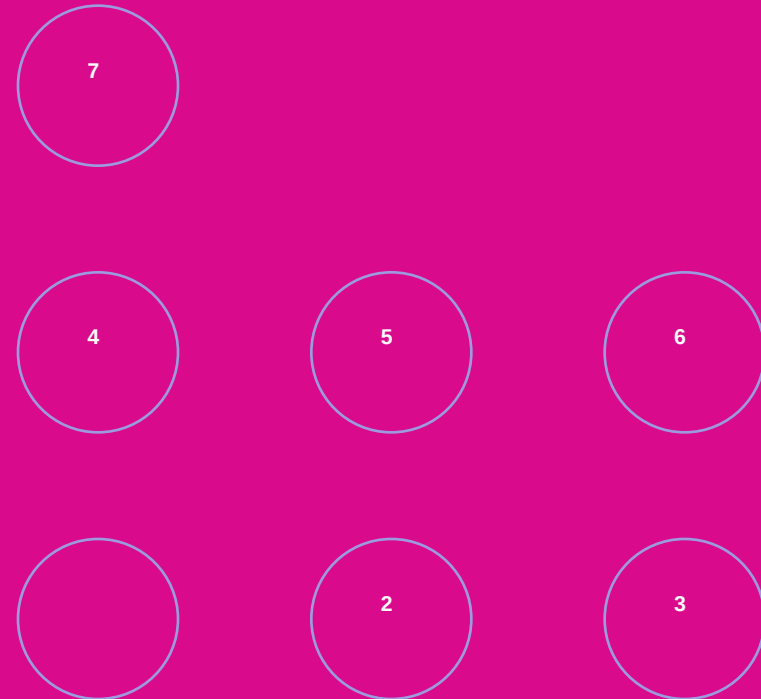

Question → evidence → decision.

Commercial analysis

Transparent scoring and scenario logic.

Information design

Decision-focused dashboard and

hierarchy.

Systems thinking

Linking network, capacity and financial outcomes.

Presentation craft

Consistent visual rhythm and concise copy.
