

IT Transformation

A fictionalised case study demonstrating technology strategy, architecture thinking, governance and transformation planning.

Transformation brief

A fictional technology leadership
scenario
FORMAT

ROLE
Executive case study

Head of IT
The original visual structure was
rebuilt around a fictional technology
organisation. Names, marks,
imagery, metrics and content are
intentionally new.

SCOPE

Platforms • Security • Data

The problem

Modernise without disrupting the business

LEGACY

Fragmented platforms

RISK

Inconsistent controls

DEMAND

Faster digital delivery

The case demonstrates problem framing, prioritisation and communication between technology and business stakeholders.

Target architecture

01

A simplified technology landscape

SERVICES

Lake • BI

This diagram is conceptual. It is designed to show architecture communication skills without reproducing any employer-specific system.

DATA

02

EXPERIENCE

APIs • Applications

FOUNDATION

EXPERIENCE

FOUNDATION

03

Web • Mobile

DATA

Cloud • Network • Security

SERVICES

Service health cockpit

Illustrative operational metrics
AVAILABILITY
99.92%

INCIDENTS

-26%

DEPLOY LEAD TIME

-41%

PATCH COMPLIANCE

97%

All metrics are fictional and are used to demonstrate dashboard composition and operational storytelling.

Availability

99.92%

Incidents

-26%

Deploy lead time

-41%

Patch compliance

97%

Security-by-design

Delivery model

A practical governance rhythm

WEEKLY

Delivery review

MONTHLY

Architecture board

QUARTERLY

Portfolio review

ALWAYS

Risk & controls

The emphasis is on repeatable governance: clear forums, decision rights and a visible escalation path.
